About Build91

Build91 is revolutionizing the interiors industry by empowering architects/designers and homeowners to seamlessly design and visualize home interiors with precision and ease. Building proprietary technology, Build91 aims to bridge the gap between creative design and practical implementation, offering quick design ideas and 3D visualization using AR and Video walkthroughs.

Founded by Mohit Mathur and Amit Mathur, seasoned entrepreneurs with a proven track record, Build91 is built on a foundation of innovation and operational excellence. The duo previously founded OneFitPlus, a fitness tech platform that scaled rapidly to become a market leader before being acquired by Cult.Fit for $40 million USD. Their experience in building scalable businesses extends to their tenure at Amazon, and across multiple countries where they honed their skills in technology, customer-centric solutions, and logistics.

As IIM and Amazon alumni with deep insights into market dynamics and business strategy, the founders bring a wealth of expertise in managing high-growth ventures. Under their leadership, Build91 is poised to disrupt the fragmented home design market with its cutting-edge solutions and customer-first approach.

Position: Software Engineering Intern

Location: Raipur (Full Time)
Experience: 0-1 Years
Industry: Architectural Visualization, Interior Design, Construction

Position Overview:

We are looking for passionate developers who thrive on challenging problems, continuous learning, and delivering results. You will be at the forefront of innovation, utilizing the latest technologies in AI, and 3D and AI-powered coding assistants like Claude code, Antigravity, or Codex, to streamline the creation and visualization of interior designs and its sourcing. Your work will directly contribute to software products, contributing to **Build91 Studio** and **Build91 Sourcing** businesses in live production.

Key Responsibilities:

- Design, code, and implement robust solutions, leveraging AI-powered coding tools starting with broadly defined problems.
- Actively contribute to core projects:
    - Build91 3D Studio: Develop a service-driven product application for advanced 3D modeling and Rendering using AI.
    - Build91 Sourcing**:** Engineer features to use AI to generate and save personalized design recommendations for clients/projects, and automatically catalog product inventory and management.
    - AI Video Gen: Build an AI pipeline to generate custom hyper realistic long format video's for content and digital marketing
- Root cause and solve problems in a high-speed, dynamic environment.
- Learn new tools and technologies independently (3D, AI).
- Collaborate with cross-functional teams to develop new solutions and enhance

existing systems and processes.
- Work in an agile environment to deliver high-quality software.

Required Skills & Qualifications:

- Pursuing B.Tech / M.Tech in Computer Science, IT, or related disciplines.
- Preferred: React JS, Node JS, NestJS, Next JS, Python, AWS, Integration with and using LLMs locally or using API
- Good to have: Familiarity or interest in using AI-powered coding assistants (e.g., Claude code, Antigravity, or Codex) to enhance productivity.
- Effective communication to collaborate with leadership and cross-functional teams

What We Offer:

- Real-World Impact: Work on live projects transforming the interior design industry.
- Mentorship by Proven Founders: Work directly with seasoned entrepreneurs who've scaled startups and led at global companies.
- Skill Development: Gain hands-on experience across 3D tech, AI pipelines, and AR app development.
- Ownership & Innovation: Contribute ideas, take ownership of modules, and build portfolio-defining work.
- Career Growth Opportunities: Potential for PPOs or full-time roles
- Agile, Collaborative Culture: Join a fast-moving, customer-focused team where your ideas and feedback drive change.

Join Build91 and be part of a journey that transforms the interiors experience through technology!
